

# The Top Choice for AP Approval & Content Management

TimberScan has by far **the largest market share** with over 1,500 clients and more than 25,000 users.

Works with Sage 300 Construction & Real Estate and Sage 100 Contractor.

Core Associates, the makers of TimberScan, is a Sage Development Partner with a **highly rated technical support** team comprised of many **Sage Certified** consultants.

Construction and Real Estate Development Partner

## For Finance and Accounting

- Best A/P approval workflow available
- Data entry in TimberScan is the same as Sage 300 CRE
- Exceptional Content Management System for all documents, emails, images, and other content with the ability to add workflows and route for approvals
- Unlimited AIM Search users at no additional cost
- Email Monitoring automatically moves invoice attachments from your email account to the TimberScan folder
- Optional, cloud-based mobile app for approval of A/P invoices 
- Optional module uses Optical Character Recognition (OCR) to extract pertinent invoice information and prefill data entry, saving time 
- Optional module enables workflows to be added to any document, for example: distribute paystubs to all employees by email or text messaging; documents can be password protected and delivered securely with one command 

## For Operations Teams

- TimberScan can integrate form, portal, and application data across platforms with Core Cloud Systems
- The single platform system is mobile-friendly and works with iPhones and Android devices
- Electronic forms are easy to create and customize with several prebuilt options.

Current solutions include:

1. CCS eForms – Forms Generation
2. CCS Credit Card & Financial
3. CCS Payroll
4. CCS PO / Inventory
5. CCS Service Work Order
