

# Core Cloud Systems - CCS PO/Inv

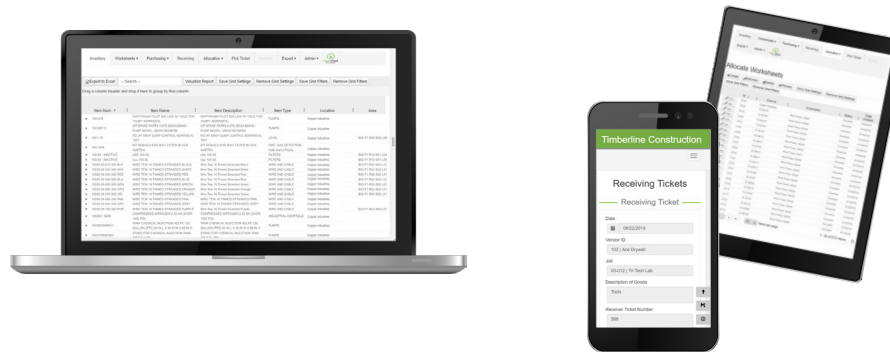

A better, fully mobilized and custom materials management solution for Sage CRE users

## 1. Create, Review, Approve, and Send PO's from Anywhere

## 2. Manage Materials, Equipment, and Inventory

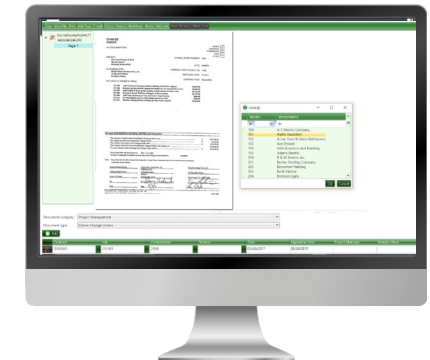

## 3. Receive and Allocate

## 4. Integrate with Your Systems

Sage 300 CRE Commitments

TimberScan

### 1. Create POs from any device then submit POs for review and approval (device or grid)

- Drill down for simple editing and coding options then filter grid by approver
- Send approved POs to vendors by email directly from CCS and sync commitments with Sage and TimberScan
- Invoice vouchering provides seamless integration to TimberScan to reduce data entry

### 2. Execute custom materials management to fit your processes:

- Includes multi-location capability, a simple UOM conversion feature, and an auditable sub ledger. Leverage Avg, LIFO, or FIFO costing methods
- Manage physical counts, utilize custom pick tickets, and/or existing barcode systems

### 3. Receive and Allocate the way you want to

- Capture delivery documents from anywhere; create and post JC transactions
- Transfer, consume, and reserve items
- Full Buyout support

### 4. Integrate with Sage 300 CRE and TimberScan®

- Export PO data to Sage 300 CRE
- Import PO data into Sage 300 CRE Commitments
- Send documents to TimberScan, Aim, and Sage for 3 way match of invoices, lookup functionality via AIM search or Sage Paperclip

CCS PO/Inv is a custom, web-based solution. Setup times and costs are scoped on a case by case basis.
