

AP Workflow Automation for Acumatica

Make it easy to manage documents and automate AP invoice processing with TimberScan Titanium for Acumatica (formerly AcumatiScan) all while staying connected to your Acumatica system. Content management and invoice routing is made simple using a browser-based application that's user friendly and ready-to-go. With TimberScan Titanium, your business can:

- Automate AP invoice approvals with precision routing rules
- Gain tighter control of document management
- Get a simple, real-time status view of invoices and documents
- Enjoy a single point of entry for data no need to rekey information
- Choose OCR (Optical Character Recognition) capture functionality to have invoice data entered automatically and touch-free
- Customize workflows, security, and more!

Automatically Route for Approval Invoices/Documents & Cut Checks in Acumatica

Technical Requirements

For users of Acumatica Cloud ERP Construction Edition hosted by Acumatica, please refer to your Acumatica installation guide for system requirements, framework specifications, and workstation and virtual machine configurations.

For users wishing to host TimberScan Titanium for Acumatica on private servers, please refer to the specifications below:

Server Requirements

Following are the minimum (and recommended) hardware requirements for TimberScan Titanium software.

IMPORTANT NOTE: These requirements specifically address the needs of TimberScan Titanium. The needs of other packages sharing the TimberScan Titanium server (such as Acumatica) must be factored into the total hardware environment.

CPU

 2.0 GHz x64 multi core processor or faster such as those found in: Intel® Xeon® Processor 3000, 5000, 6000, 7000 Sequence, Intel® Xeon® Processor E3,E5,E7 families of processors.

Memory

• 8 GB

Disk Space

A minimum160-GB hard disk

Operating System

- Windows Server 2016 64-bit
- Windows Server 2012 R2 64-bit
- Windows Server 2012 64-bit
- Windows 8, 8.1, 10 64-bit

Workstation Requirements

CPU

 2.0 GHz processor or faster such as those found in: Intel® Pentium® and Intel® Core™ i3,i5,i7 families of processors.

<u>Memory</u>

• 2 GB

Browsers

Chrome:

54.0.2840 or newer. Recommended to always have the latest "Stable Channel" release of Chrome by allowing Chrome to auto update. Information about the latest "Stable Channel" release can be found
